THA-30/ THA-30X

Headamp with Vacuum Tube,
Bass Boost

FEATURES & OPERATING

Preparation

Charge up unit before use. Connect USB cable to socket ③ to charge up unit at least 8 hours if battery is fully discharged.

Connect audio cable to your device and THA-30/ THA-30X input ④ or input ⑨.

Connect your headphone to THA-30/ THA-30X socket ②.

Power On

Press and hold power button ③ over 1 second to turn on unit, the power indicator will turn to GREEN color.

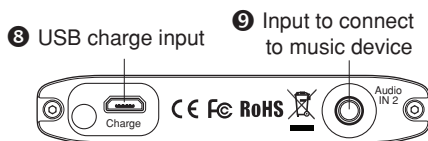

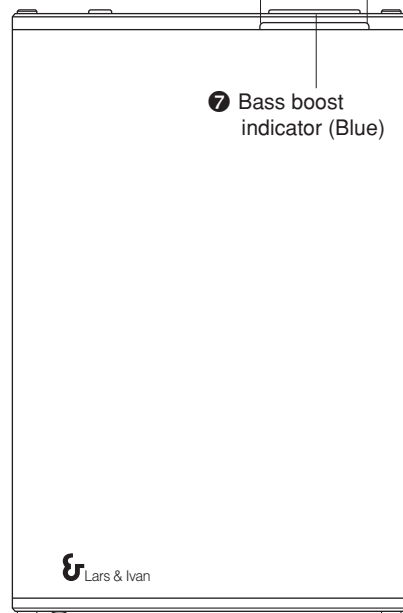

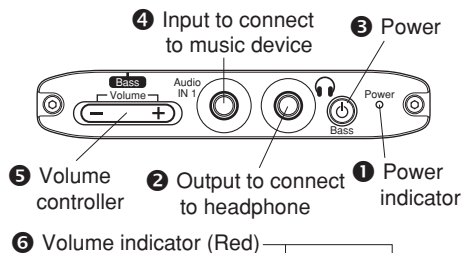

Adjust Volume

You can adjust the volume output by press volume control (+) or (-) to increase volume or reduce volume level.

When press (+) or (-), Volume indicator Red LED ⑥ will flash. If press and hold (+) or (-) volume control, the LED volume indicator will continuous to flash until Max. or Min. volume level reach respectively.

Bass Boost Mode

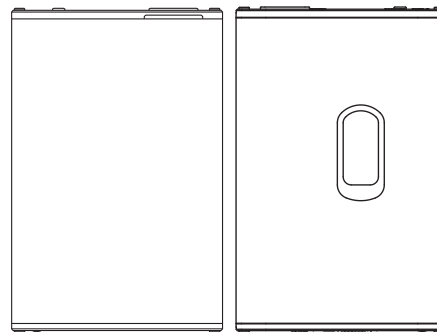

You can select different vocal mode by a short press at power button ③. Bass Boost Blue LED ⑦ indicator will be ON.

Remark

The volume and vocal mode you selected will be remembered by THA-30/ THA30X even unit is power OFF. Next time when you power up unit, the last settings will be restored.

THA-30/ THA-30X is a sophisticated device for smart phones, if you are using other music device that cannot match THA-30/ THA-30X due to different wiring configuration. You need to insert a conversion cable between THA-30/ THA-30X and to your music device and headphone. (Conversion cables need to be purchased separately)
